Detailed Action

In response to the Final Office Action mailed on 05/27/10, applicants' Appeal-brief/arguments filed on 09/28/10 are acknowledged. Applicants' amendments and arguments filed on 09/28/10 have been fully considered and are deemed to be persuasive to overcome the rejections previously applied in consultation with SPE Jon Weber in an Appeal-brief conference conducted on 10/14/10.

Previous rejection of claims 7-9 and 14-17 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-9 and 14-17 of co-pending application 12/505,723 (Hirota et al.), is being withdrawn as the instant application has an earlier filing date (filing date 09/22/05) than the copending application 12/505,723 (filing date 07/20/09).

Previous rejection of claim 1 and claims 2-9 and 14-17 depending therefrom rejected under 35 U.S.C. 112, first paragraph for enablement and written-description, is being withdrawn due to persuasive arguments by the applicants', as pointed out by the applicants', the non-mutated wild-type gene structure of barley lipoxygenase-1 (LOX-1) is well known and characterized. Applicants' have identified and isolated a beneficial mutant of this known gene that resides at the splice donor site of the 5th intron.

Rejections and/or objections not reiterated from previous office action are hereby withdrawn.

Claims 1-17 are pending in this application and are being considered for examination.

Examiner's Amendment

Art Unit: 1652

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with Daniel J. Pereira on 10/14/10.

The application has been amended as follows:

In the Claims

Claim 2: Line 2, delete "base at the splicing donor site is adenine." and replace with "nucleotide guanine at the splicing donor site is replaced with adenine."

Allowable Subject Matter

Claims 1-17 are allowed.

Claims 1-17 are directed to an isolated barley lipoxygenase-1 (LOX-1) mutant gene, wherein the guanine at the splice donor site (5'-GT-3') of the 5th intron is mutated and a selection method for identifying and isolating said mutant LOX-1 gene, is free of prior art, and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Final Comments

To insure that each document is properly filed in the electronic file wrapper, it is requested that each of amendments to the specification, amendments to the claims,

Art Unit: 1652

Applicants' remarks, requests for extension of time, and any other distinct papers be submitted on separate pages.

It is also requested that Applicants identify support, within the original application, for any amendments to the claims and specification.
